PROFESSIONAL SUMMARY

Computer Science graduate and QA Engineer with practical experience in Quality Assurance, Manual Testing, and Test Automation of Android and web applications. Skilled in functional, regression, smoke, and API testing using Selenium WebDriver, TestNG, Appium, Postman, and RestAssured. Experienced in test case design, test execution, defect identification, documentation, and defect lifecycle tracking in Jira, collaborating with development teams to ensure software quality. Working knowledge of Agile/Scrum methodology, SDLC, STLC, automation framework design, and Page Object Model (POM). Passionate about delivering reliable software and continuously improving testing processes.

TECHNICAL SKILLS

Testing Skills: Manual Testing, Automation Testing, Functional, Regression, Smoke, Sanity, API and Cross-Browser Testing, Data-Driven Testing, Test Case Design, Test Execution, Defect Tracking, Bug Reporting, SDLC, STLC, Agile/Scrum
Languages: Java, Kotlin, SQL
Frameworks & Libraries: Selenium WebDriver, Appium, TestNG, JUnit, RestAssured, Swagger (OpenAPI), Page Object Model (POM)
Development: Android (Native - Kotlin), Web (HTML, CSS, JavaScript)
Tools & Platforms: Jira, Postman, Jenkins (CI/CD), Git, GitHub, Android Studio, Eclipse, VS Code, Firebase, Linux, REST API
Soft Skills: Resilience, Perseverance, Rapid Skill Acquisition, Inquisitive Thinker, Team Collaboration

PROFESSIONAL EXPERIENCE

QA Tester Intern | Techugo, Noida, India **Dec 2025 – May 2026**

- Performed manual testing and automated testing (functional, regression, smoke, and API testing) of Android and web applications across multiple release cycles in an Agile environment.
- Validated numerous REST API endpoints using Postman and Swagger, and tracked defects in Jira, achieving a 78–88% defect resolution rate within sprint deadlines.

Data Science & Analytics Intern | Zidio Development **Jun 2025 – Sep 2025**

- Built time series stock market prediction models using ARIMA and LSTM, achieving forecast accuracy in the 85–91% range on historical price data.
- Developed image captioning and segmentation models, improving accuracy to the 80–86% range through iterative tuning and model validation.

TECHNICAL PROJECTS

Chat Nova – AI-Powered Chatbot Application **Jan 2025**

- Engineered an AI-driven mobile chatbot delivering responsive, human-like conversations using Google's Gemini API, with Firebase authentication and offline functionality.
- Optimized app performance by 30%, reducing UI response time and improving user satisfaction.

Tech: Android Studio (Kotlin), Firebase, Gemini API, Retrofit, XML, Lottie Animations | GitHub: github.com/Rajcharchil

API Testing for Real-Time Communication Platform **Apr 2025**

- Designed and simulated REST APIs (users, messages, calls, contacts) and executed data-driven API testing using Postman across CSV and JSON files.
- Validated response status codes, response time, and business logic across a wide range of real-world test scenarios.

Tech: Postman, Swagger (OpenAPI), JSON Server, REST API, CSV/JSON (data-driven testing)

Web Application Functional Testing **May 2024**

- Executed functional UI automation testing using Selenium WebDriver and TestNG with Page Object Model (POM), covering login, registration, form validation, and navigation flows.
- Conducted cross-browser testing across Chrome, Firefox, and Edge, maintaining detailed bug logs and test execution reports.

Tech: Selenium WebDriver, TestNG, Java, Eclipse IDE, POM | GitHub: github.com/Rajcharchil/flipkart_Automation_Testing

ACHIEVEMENTS

AI-Powered Early Disease Detection – Hackathon Project (Team Member) **Feb 2025**

- Secured 2nd Runner-Up position in a 24-hour hackathon, developing an AI-based early disease detection solution (TensorFlow, OpenCV) with 95% accuracy on X-ray and skin images, deployed via Streamlit.

CERTIFICATIONS

- Software Engineering: Implementation and Testing – The Hong Kong University of Science and Technology, Jul 2024
- Mastering Data Structures & Algorithms using C++ – Udemy, Feb 2024 (58.5 Hours)

EDUCATION

B.Tech, Computer Science and Engineering | Lovely Professional University, Punjab, India | CGPA: 7.0 **2022 – 2026**

12th (Science) | Holy Cross Public School, Muzaffarpur, Bihar | Percentage: 69% **May 2019 – Mar 2021**
